

Supplementary file S1: AEP-Media SoftwareX Supplementary Material

AEP-Media: Reusable Research Software for Offline Validation of Time-Aware Media Evidence Bundles

Author: Bin Zhang; Independent Researcher, China; ORCID: 0009-0002-8861-1481; Email: joy7759@gmail.com

Software name	AEP-Media
Version	aep-media-v0.1.0
Repository	https://github.com/joy7758/agent-evidence
GitHub release	https://github.com/joy7758/agent-evidence/releases/tag/aep-media-v0.1.0
Zenodo DOI	10.5281/zenodo.20107097
Zenodo record	https://zenodo.org/records/20107097
License	Apache-2.0

Purpose and scope

This supplementary file summarizes the review support material for the SoftwareX submission. It is provided as a portal-safe PDF so that Editorial Manager does not unpack a compressed archive. The machine-readable schemas, examples, reports, and release files are available through the GitHub release and Zenodo archive listed above.

Included supplementary contents

- Supplement README and reproduction notes.
- Claim-boundary statement for local validation and fixture-based adapter ingestion.
- Software inventory covering source modules, schemas, examples, demos, and tests.
- Evaluation summary for default, adapter-inclusive, optional-tool, and combined matrices.
- Selected schemas and examples represented in the archived release materials.
- Checksums and release-validation report pointers.

Reproducibility commands

```
python -m pip install -e .
agent-evidence --help
agent-evidence validate-media-profile examples/media/minimal-valid-media-evidence.json
agent-evidence build-media-bundle examples/media/minimal-valid-media-evidence.json --out /tmp/aep-media-bundle-check
agent-evidence verify-media-bundle /tmp/aep-media-bundle-check
agent-evidence validate-media-time-profile examples/media/time/minimal-valid-time-aware-media-evidence.json
agent-evidence run-media-evaluation --out /tmp/aep-media-evaluation
```

AEP-Media v0.1.0 validation summary

Targeted AEP-Media tests	48 passed, 1 warning
SoftwareX/readiness tests	23 passed, 1 warning
Full test suite	155 passed, 1 skipped, 15 warnings
Default evaluation	18 cases, unexpected=0
Adapter-inclusive evaluation	26 cases, unexpected=0
Optional-tool reporting evaluation	23 cases, unexpected=0
Combined adapter and optional-tool evaluation	31 cases, unexpected=0

Release pack	PASS aep-media-release-pack@0.1
---------------------	---------------------------------

Claim boundary

AEP-Media supports local validation and fixture-based adapter ingestion. It does not claim legal admissibility, non-repudiation, trusted timestamping, real PTP proof, full MP4 PRFT parsing, real C2PA signature verification, chain of custody, production deployment, or proof that the original media capture event was truthful, authorized, or unmodified before packaging.

Portal note

This PDF is the submitted Supplementary file S1. The full machine-readable release is citable through Zenodo DOI [10.5281/zenodo.20107097](https://doi.org/10.5281/zenodo.20107097) and traceable through the GitHub release tag `aep-media-v0.1.0`.
